

## PDD Skógarkolefni

The description document should contain at least the following details:

<b>Carbon crediting programme criteria</b>	<b>Skógarkolefni</b>
Name of the mitigation activity, activity type, contact.	YES
Precise mitigation activity location, coordinates.	YES
Description of the mitigation activity, the technologies or methods used to produce the mitigation outcome.	YES
Start date and duration of the mitigation activity.	YES
Scope of the mitigation activity: the GHG sources or sinks considered in quantification.	YES
Description of the baseline scenario, situation existing prior to implementation of the mitigation activity.	YES
Description and justification of the mitigation activity's additionality.	YES
Description of the methodology used for quantifying the mitigation outcome.	YES
Description of the legality of the mitigation activity.	YES
Estimate of the amount of carbon leakage, description of leakage risk management.	YES
Mitigation outcomes estimated in advance using the quantification methodology applied.	YES
Description of how the mitigation activity avoids social and environmental harms and why the activity will do no significant harm (DNSH)	YES
Parameters monitored during the mitigation activity and those fixed at the start of the activity (e.g. emission factors).	YES
